PIXELS2GENAI

Pixels2GenAI is an exhibition by software developers creating computer art. We have used equations, algorithms, and AI models to generate images and installations. The artists explore the space between hand-programmed images, the aesthetics of mathematical rules, and AI as an art-making tool. At the end of March 2026, the office of IT studio Academis will transform into a gallery.

The exhibition opens on March 27 at 6 pm at Steinmetzstrasse 40 in Schöneberg for press and invited guests.

It will remain open for the general public on March 28 from 10 am to 4pm.

Admission is free.

The project lead can be reached at

kristian.rother@posteo.de (www.academis.eu).
